

**Machine for turn over frame and end wall chocolate boxes!**

**Texas erector** equipped with double tool is a method to simultaneously form bottom and top to chocolate boxes. Operate several sizes in the same machine - you will be surprised of the favourable economic values!

**Quick-change!** A complete size change is normally done in about 2-3 minutes and much of that time is used to take out the remaining stack of blanks of the finished run and then to load new blanks in the next size to be operated

Turn over frame wall	max X	max 2 X	L*	W	H	T	Speed/min
Texas M-1000	665	-	120-450	130-255	20-60	15	< 45
Texas MH-1000	665	-	120-450	130-355	20-60	15	< 45
Texas MW2-1500	460	920	120-300	130-255	20-60	15	< 2 x 45
Texas MW2-1700	560	1120	120-400	130-255	20-60	15	< 2 x 45
Texas MHW2-1500	460	920	120-300	130-355	20-60	15	< 2 x 40
Texas MHW2-1700	560	1120	120-400	130-355	20-60	15	< 2 x 40
General	460-710		120-550	130-355	20-60	15	< 2 x 35-45

\* Vid kort längd, kontrollera att flikar inte kolliderar. Om så är fallet måste hastigheten reduceras.

\* If short L, control so flaps do not get in conflict. If so speed must be recuced.

Turn over end wall	max X	max 2 X	L*	W	H		Speed/min
