TURBO SYSTEMS

Come see what's new at TURBO PMCA April 16, 2007 • Booth # 91

MF - HAMBURG

Standard and **custom** enrobing lines for confectionery, bakery, snack foods, and ice cream products. Enrobers, tempering machines, and cooling tunnels are designed for quick wash-down in place for fast change-over and allergen cleaning. Systems are available in belt widths from 12 to 72 inches and operating speeds up to 50 feet/min.

AEROS

Process systems for the manufacturing of aerated confectionery, bakery and dairy products, including pre-mixers, cookers, aerators & homogenizers, extrusion manifolds, etc. Mixing heads are machined from solid stainless steel, resulting in stronger pins and facilitating better cleaning. Also featuring custom build high quality sanitary stainless piping at very attractive prices.

TURBO - KE HUA

Multi-functional wafer production systems for flat and specialty wafers, including batter mixing, wafer ovens, coolers, cream depositing & stacking, waferbook cooling, and cutting. All systems (except oven interior) are made of stainless steel and designed for easy cleaning and change over.

TURBO - MULTI WEIGH

Easy-Clean waterproof Multi-Head weighing systems and baggers for all types of candy and snacks including chocolates, gums, jellies, seeds & nuts, pretzels, petfood, cookies, crackers, etc. Systems feature high weighing accuracy, self diagnostics control system, and fast replaceable modular parts for easy and straight forward maintenance.

Processing...All Day...Every Day

TURBO SYSTEMS

KRÜGER & SALECKER

Specialty forming systems for plastic and semi plastic kinds of confectionery and bakery items including strand extruders, automatic rotary moulders, granola bar formers, belt sprinklers, ball rolling machines & powdering drums, conveyors, etc.

DÖINGHAUS

Ultra Sonic Cutting & Slitting systems for a wide range of applications in the confectionery, bakery, and snack and pet foods industry. Unique free programmable cutting system to produce various shapes, and allowing for both continuous slab and batch applications.

TURBO - SOONTRUE

Packaging machines from China for all varieties of confectionery, baked and ice-cream products, including fully automatic vertical bagging machines, nitrogen purge, wash down all stainless steel designs, multi lane, triangular, including volumetric feeding from multi-head weighing systems, fill and seal, horizontal flow wrappers, and complete case packing systems.
